

The Smitsen DD5-HD Heavy Duty sewing machine series head is designed for seaming heavy weight fabric. With upper and lower feed. It's large rotary hook (KRT132) which can hold thicker thread, the unique free-feed stitching function make this model specially suitable for sewing belts to FIBC bags. The Smitsen DD5-HD is also suitable for producing heavy weight safety belts and cargo lifting belts such as webbing slings, rounds slings etc.

Extended arm (400 mm) to fit thick and long materials under the sewing machine.

Pneumatic Presser foot lift: 18mm for easy operation available as an option.

Suitable for the production of safety belts and cargo belts such as webbing slings

Attaching belts to FIBC Bags, Leather sewing, tents, covers, Geo textiles and more.
